**Chairman's Message**

As a backbone industry of Korea, the steel industry has been leading the development of the Korean economy by providing the core of the industry, steel for the machinery, automobile, construction, shipbuilding and electronic industries.

Also, from small needles to artificial satellites which travel in outer space, steel has indispensable relationships with our lives and makes a huge contribution to improving our living conditions.

By promoting the development of the steel industry and enhancing steel export, KOSA strives to contribute itself to the development of the Korean economy and the prosperity of people’s lives.

This homepage contains general information on the steel industry as well as various data and statistics on the steel industry and will be used to listen to your diverse opinions.

Your participation and attention are needed for this homepage to grow into a open space for the development of the steel industry. So, your love and support will be highly appreciated.

Thank you.
