FOCUS

Chemistry is at the Heart of What We Do

Now—more than ever—people don't just want sustenance. They want to know that the food we eat, the water we drink, and the products we buy, are affordable, safe, and sustainable. Chemistry plays a unique role in protecting the environment, making our world a more sustainable place, and helping people live longer, healthier lives.
The Voice of the Chemical Industry

ICCA represents chemical manufacturers and producers around the world. Leaders from the European Chemical Industry Council (CEFIC) and American Chemistry Council (ACC) typically share and alternate secretariat responsibilities every two years. ICCA members account for more than 90 percent of global chemical sales, and more than 120 million people around the globe are employed directly or indirectly by our industry.

EVENTS

Partners Around the Globe

ICCA is partnering with stakeholders from around the globe—from small- and mid-sized chemical companies in emerging economies, to non-governmental and inter-governmental organizations—in order to unlock solutions to society's biggest challenges in a safe and sustainable way.

RESOURCES

- Use of Chemical Recycling Materials in Household Brands – Bradbury’s Cheesecake
- Use of Chemical Recycling Materials in Household Brands – Magnum Ice Cream
- Turning Plastic Waste into New Products
- Picking Up Where Traditional Recycling Leaves Off
- Clearing the Air on
The International Council of Chemical Associations (ICCA) is an association of innovators, visionaries, solutions providers and product stewardship pioneers.
