

# Our members

EFAMA is a [pan-European organisation](#) representing the full diversity of the European investment management industry towards European policymakers, as well as international public bodies. Our members include national associations, which bring their country-specific expertise and viewpoints to our committees. Our corporate and associate members add multinational company perspectives to our work.

In 2020, changes were made to our Articles of Association and Internal Rules to strengthen the EU-ness of the governing bodies of EFAMA while preserving the pan-European nature of the Association.
